DETAILED ACTION

This action in response to After Final Amendment filed August 5, 2004. In the Amendment, claims 1-30 were cancelled, leaving claims 31-33 still pending. Claims 31-33 had previously been indicated as allowable.

Allowable Subject Matter

Claims 31-33 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach creating a first and second file from the source file, the file type being defined by the solicitor. Additionally, the prior art of record fails to teach providing the means for generating screen images of physical data resulting from the interrogation of the vector-based numerical data on a computer having software capable of interrogating the data, as well as a computer devoid of software capable of interrogating the data. Ogawa (US Patent 5608874) teaches a method of file conversion, however the output type is program dependant and not user specific as is claimed in the application. Also, Ogawa does not allow for the creation of multiple files. Lastly Ogawa does not include providing means for creating screen shots based on the vector-based numerical data on a computer that is devoid of software capable of interrogating the data. Similarly, Alam (US Patent 6336124) does not teach allowing multiple files, each type being selected by the solicitor, and means for creating screenshots.

The examiner considers the applicant's claims 31-33 to be allowable based on claim interpretation and the aforesaid prior arts of record.
